[UPDATED] Dow AgroSciences Expansion Moves Forward

InsideIndianaBusiness.com Report

[Inside INdiana Business Host Gerry Dick recently talked with former Dow AgroSciences CE\) and President Jerome Peribere and Browning Investments Chairman of the Board and President Michael Browning.](#)

Dow AgroSciences LLC has taken a significant step in its commitment to Indiana. A groundbreaking was held this morning for the company's 80,000 square-foot expansion at Browning Investments Inc.'s Northwest Technology Park in Indianapolis.

Dow AgroSciences says the expansion should allow it to accelerate investment in new scientific expertise for its growing seeds, traits and oils business.

The new building is expected to be home to 100 researchers working in a wide range of areas. Dow hopes to be in the structure by the middle next year.

Dow AgroSciences has signed a 15-year lease with Browning for the property, which is next to its global headquarters.

Browning will be the building's developer, owner and general contractor.

Indianapolis Mayor Greg Ballard, through a message on Twitter, has thanked Dow for the investment in the Indianapolis community.
